

Lateral Support Review Acknowledgment Form

Per Los Angeles Municipal Code Section (LAMC) 62.02, imperilment, or removal of lateral support of the public right of way requires a cash deposit or bond, and the issuance of a Public Works Excavation "E" permit.

This questionnaire will help in determining the following:

- Whether your project imperils or removes lateral support of the Public Right of Way (ROW)
- If the issuance of Public Works permit is required as a condition of a Building and Safety Permit Clearance.

The following questions pertain only to excavation in the vicinity of the property line(s) adjacent to City street(s)

Site address: _____ LADBS Building/Shoring/PCIS No. _____

From building, shoring or grading plans:

- Does the excavation face any public street(s) or alley(s)?
- Is the excavation depth, from the bottom of the footing to the street surface greater than 3 feet?
 - If Yes, What is the depth from the street surface to bottom of the footing?
- How far is the excavation from the property line adjoining the City street?
- Will any tie backs remain in the right of way once excavation is complete?
- What is the proposed method of shoring? _____
- Will any part of the shoring system be installed/remain in Public ROW?

Applicant Acknowledgement: I, the undersigned, acknowledge the following:

- the answers to the questions provided above are correct to the best of my knowledge.
- the Bureau of Engineering (BOE) lateral support review acknowledgment is based solely upon the answers provided above.
- any change from answers provided above during plan submittal may result in an alternate recommendation.
- If a BOE lateral support review is required, initial deposits to BOE are required prior to the lateral support review.
- Delay in initiating the payment will delay the issuance of the Public Works permit and ultimate clearance of permit
